Fiction Concerning Sargosa Sea.
The Sargosa sea in the north Atlantic is an area through which no ocean currents pass. It is comparatively still water, forming a sort of eddy into which seaweed tends to drift. Writers of fiction have held that the dead ships of the ages have found resting places in this eddy and have peopled them with the spirits of lost mariners. The idea is pure fiction. The Sargosa sea may be navigated without experiencing any difficulty with seaweed and without seeing a derelict.

High Cost of Leisure.

"I only beg the thoughtful consideration of younger men who have the good of the Republic at heart seriously to consider the problem as to whether the only way in which to meet the increasing difficulties of American Life is not the additional striving to **produce more, to earn more, to economize more, and to save more.**"

John R. Marshall,
Vice President of United States.

And the greatest of these is **SAVE MORE.**
